

Community Congress Toolkit Announcement

The 119th Congress is underway. The EveryLife Foundation has adjusted our PRV toolkit materials to help the community continue advocacy efforts for the reauthorization of the Rare Pediatric Disease PRV Program. The toolkit includes sample social media messaging, resources for information about the bill, disease groups directly impacted by the PRV program, and a list of counterpoints to arguments that have been made against reauthorizing the program.

The toolkit materials can be found [here](#), along with general information about the program and our action alert. Please share this with your community and join us in highlighting the importance of reauthorizing this critical program.
